## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are considered vague and indefinite for the following reasons:

(a) The claims are considered vague and indefinite because of the phrases which include “preferably”. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, the claims recite a broad recitation, followed by a phrase including “preferably” which is the narrower statement of the range/limitation.

(b) Claim 1 recites the limitations "the container lip" and “said cant members” in lines 3 and 7, respectively. There is insufficient antecedent basis for this limitation in the claim.

(c) The language and wording of claim 6 is confusing.

Art Unit: 3781

(d) The dependent claims not specifically mentioned are rejected as being dependent upon a rejected base claim since they inherently contain the same deficiencies therein.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 6-11, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Von Holdt (U.S. 5,979,691). Von Holdt teaches a container 10, of plastic, having a lid 12 for closing the container. The lid has a receiving area at 22 in which, when the container is in the closed state, the container lip 16 is held. The interacting latch-detent hook members and sealing surfaces, which are shown in figures 3 and 5, are provided in the receiving area of the lid and on the lip of the container opening, the catch members are configured such that when the container is in the closed state, the sealing surfaces are pressed together reliably to form seals. The receiving area of the lid and the said lip of the said container opening are engineered such that closure of the container with the lid is effected by a pushing of the lid onto the container from above. The container of Von Holdt has 8 latch-detent hook member pairs.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3781

6. Claim 5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Von Holdt (U.S. 5,979,691) in view of Wagli (CH 672,473). Von Holdt discloses the claimed invention except for the gasket. Wagli teaches that it is known to provide a container with a gasket. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Von Holdt with the gasket of Wagli, in order to better seal the container even when surface irregularities occur on the container lip or lid channel.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the locking mechanism.

8. THIS ACTION IS NON-FINAL.
